

"We are just friends walking together. Keep Learning".

Burak Kekeç

 **CHIEF TECHNOLOGY OFFICER**

## Why Ant Media

*My goal is to develop Ant Media into an ecosystem where many people can contribute their projects, plugins, applications, and more. As the CTO, there is no greater satisfaction than when my team and I resolve an issue or implement a feature for a user and receive confirmation that it has fixed their problem.*

*I have been developing the Ant Media Server by implementing new protocols, interfaces, SDKs, and more. **Nowadays, I am trying to direct my and our development team's energy into the correct direction for our next layer of growth.***

## The most exciting trend in streaming media right now?

*AI, as it is in most industries, is what is most exciting right now. It can use and interpret video and audio streams. It can see you, listen to you, and answer.*
